

Your hand dryers are harming your employees and customers. They need to be removed

They emit toxic streams of bacteria and fungus — **49 to 110 times** the contamination in the surrounding room air — and spray it onto hands. The dirty water sprays the wall, floor and user. The walls grow mold. They burn **eight to ten times the energy and CO₂** than the manufacturers claim. They are not Green machines.

ROOM AIR, DRYER AIR, BROWN PAPER TOWELS, AND WHITE PAPER TOWELS

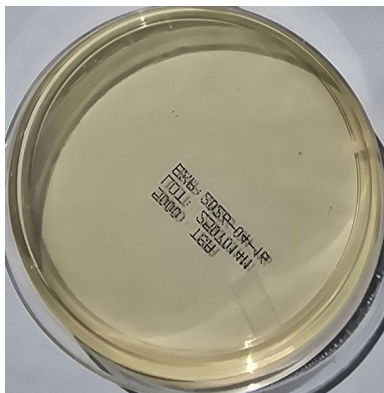

Room air · 60 sec

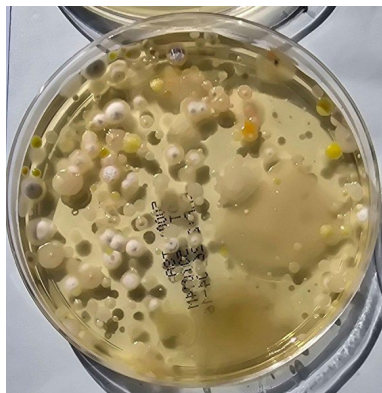

Dryer output · 60 sec

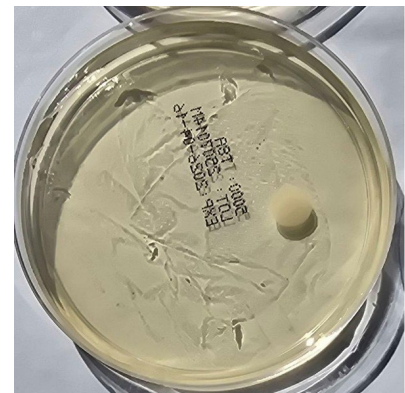

Brown towel · 30 sec

Room air · 60 sec

Dryer output · 60 sec

White towel · 30 sec

Same restroom, same moment, side by side: room air is nearly clean, the dryer's output is heavily contaminated, and the towel result follows — brown towels carry growth, white towels approach sterility. Across 226 restrooms and 1,076 culture dishes, roughly 50,000 colonies counted by hand, 100% consistency, no tested exceptions

DRYERS DON'T DRY AND THEY AREN'T GREEN – THE CLAIM, THE TESTS, THE ENERGY

DRYER

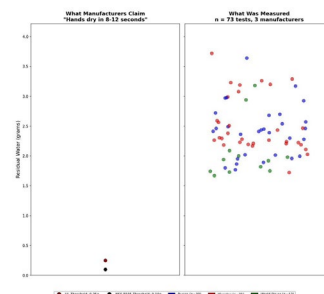

SP -H (HEPA Filter) OPTIONS: -1.1N (Noise Reduction Noz

TESTED TO
PCR DRY TIME: 8 SECONDS¹
GUIDELINES

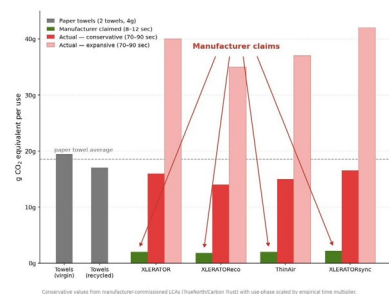

Smart EPD[®] verifies Environmental Product Declaration with global Product Category Rules (PCR) for hand dryers. Third-party testing to these guidelines document impact is detailed in Environmental Product Declaration applies comparisons and more informed product select

The manufacturer's 8-second claim, beside the certifier's mark.

Claimed 8–12 sec vs. what 73 tests measured.

Energy & CO₂ per dry: claimed vs. real run time.
